

Letter of Motivation — enGlobe_connect

Bogotá D.C, Colombia
20/07/2026

To whom it may concern,

My name is Simón Porras Villalobos, a Multimedia Engineering student at Universidad Militar Nueva Granada, and I would like to express my interest in taking part in this edition of enGlobe_connect alongside Adidas Colombia.

Throughout my studies, I have built a strong base in software development, working in different areas and learning to work well in teams, adapt quickly to new challenges, and stay focused on quality even under pressure. I see enGlobe_connect as a great chance to use these skills in a new, international setting.

I am especially interested in this opportunity because it brings together three things I am looking for at this point in my studies: learning new skills in a professional environment different from what I am used to, getting to know a new culture and new ways of thinking and working, and improving my English through real, everyday use instead of just the classroom. I also see this project as a real chance to show my development skills in a challenging environment, with the same level of effort and quality I try to bring to everything I do.

I believe this experience would not only help my professional growth, but also let me contribute actively to the project, bringing a solid technical base, a strong ability to learn, and a real interest in adapting to an international environment.

Thank you for considering my application.

Sincerely,
Simón Porras Villalobos
